Profile

Motivated Computer Science student with a strong foundation in web development, Java, and front-end technologies. Passionate about building functional, clean, and accessible applications as well as learning new technologies. Eager to contribute to a development team as a developer and continuously grow through hands-on experience.

Education

Democritus University of Thrace (D.U.Th.)

Oct 2021 – Expected 2026

B.Sc. in Computer Science, Kavala, Greece

- Experimented with many tools / languages as part of my studies.

Experience

Freelance Web Developer, Remote

April 2024 – Present

- Built modern and customizable B2B and B2C websites using Astro and Sanity CMS, with features like product/category management and rich text support.
- My work:
 - [promotelio](#) B2B website for a hotel supply and print services company.
 - [ezoumpouli](#) B2C promotional website for a local retail business.

Baggage Handler, Swissport – Kavala, Greece

August 2022 – October 2022

- Ensured efficient, timely handling of luggage for both inbound and outbound flights.
- Developed strong teamwork and communication skills in a fast-paced environment.
