Profile

Final-year Computer Science student with a strong foundation in web development and front-end technologies. Passionate about building functional, clean, and accessible interfaces as well as learning new technologies. Eager to contribute to a team across front-end development and platform engineering. Continuously growing through hands-on experience.

Education

Democritus University of Thrace (D.U.Th.) Oct 2021 – Expected 2026
B.Sc. in Computer Science, Kavala, Greece

AWS Certified Solutions Architect – Associate (SAA-C03) Amazon Web Services Expected Sept 2026

Experience

Web Developer Intern, AboutNet — On-site, Athens, Greece June 2026 – Aug 2026
Built and maintained client websites using WordPress and Elementor as part of the development team.

Freelance Web Developer, Remote Astro, Sanity CMS, Netlify June 2025 – Present
Designed, developed, and deployed modern, scalable B2B and B2C websites using Astro with a headless CMS architecture (Sanity), achieving 100/100 Lighthouse SEO scores across all projects through structured content, semantic markup, and accessibility-conscious design.

- Gathered requirements directly from clients and translated them into site structure, layout, and content.
- Implemented structured content models for product/category management, rich-text content, and dynamic site generation.
- Deployed and managed production builds using Netlify with CI/CD pipelines.
- Client projects:
 - [promotelio](#) — B2B website for a hotel supply and commercial printing company.
 - [ezoumpouli](#) — B2C promotional website for a local retailer, establishing their first online presence and organic search visibility.
 - [deltaspar](#) — B2B website for a fruit packaging plant. WCAG 2.1 AA compliant.

Projects

Gainly - Financial Intelligence Tech stack : React, Tailwind, Firebase, Tink API, ARIMA [Live site](#)
Personal finance platform with budgeting, transactions, investments, AI-assisted insights and more.

- Built with React + Tailwind, Firebase backend (Firestore, Functions, Auth, Deploy), API integration, and time-series forecasting (ARIMA.js).
